DETAILED ACTION

1. Claims 11-18 and 20 in condition for allowance.
2. The following is an examiner's statement of reasons for allowance: The prior arts of record do not disclose alone or in reasonable combination the following:

The Examiner, in the previous arguments from the Applicant filed 10/13/2005, based on the claims and arguments as presented regarding the blocking signal generator and checking circuit in that the blocking signal generator generates only a signal that indicates that the window is moving to a fully closed position, therefore would not generate any indication that there is foreign object or similar that impedes the window. Further, a checking circuit that checks whether one of the first and second controller generates the same blocking signal. Therefore, the prior arts of record do not disclose the first controller causes the first window lifter motor to move the first window pane to approximately closed position if the checking circuit detects the blocking signal from the second controller and causes the first window lifter motor to move the first window pane to a fully close position if the checking circuit does not detect the blocking signal from the second controller.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
